# Brandon Timok

Full-stack developer • Henderson, NV

dev-portfolio-2-0.vercel.app/ • linkedin.com/in/brandon-timok-589765253/ • github.com/B-Timok

## SUMMARY

I build pragmatic, minimal interfaces and reliable backends. Toolkit: Next.js, TypeScript, Tailwind, React Native/Expo, Supabase/Postgres, Docker, and C#/.NET or Node APIs — shipping with Vercel, Resend, and integrations like RevenueCat + Apple IAP. Currently developing Athlos, a mobile app for personalized AI-powered workouts, and shipping AI-assisted tools for educators. Open to freelance and full-time roles; remote-friendly (US hours).

## EDUCATION

B.S. in Computer Science, UNLV (2024)

## SKILLS

TypeScript, React/Next.js, Tailwind, Supabase • C# / Node, Postgres • Performance, accessibility, maintainability; clean interfaces and sensible APIs

## EXPERIENCE

### Web Developer — Freelance                                                                 Dec 2024 – Present

Delivering websites for local businesses with a focus on speed and maintainability.

- Information architecture, copy support, and brand alignment
- Accessible components and SEO-friendly markup
- Simple content workflows for non-technical editors

### Software Developer — Lessi AI                                                             Jul 2024 – March 2025

Building AI-assisted tools for educators. Shipping fast in a lean environment.

- Designed and implemented modular REST APIs for lesson plans and user profiles
- Worked with APIs, PostgreSQL, Docker, and GitHub for application development
- Collaborated with the team to implement new features and improve existing ones

### Web Development Intern — UNLV OED                                                         Nov 2023 – Mar 2024

Modernized client websites and improved SEO and accessibility.

- Shipped UX improvements that reduced bounce rate on key pages
- Audited and improved color contrast, headings, and semantics
- Set up meetings with clients to discuss their needs and goals

### Founder & Operator — E-commerce (Shopify)                                                 2017 – 2021

Bootstrapped a Shopify business pre-CS: storefront build, growth, and operations.

- Launched and maintained a custom Shopify storefront (themes, payments, apps)
- Hired and managed 100+ contractors; built processes for recruiting and onboarding
- Owned customer support, marketing, and advertising across channels

## PROJECTS

### Athlos Fitness (Full Stack Mobile App) https://apps.apple.com/us/app/athlos-fitness/id6744072500

- Shipped to the App Store; ran a TestFlight beta with 30+ testers; subscriptions via RevenueCat + Apple IAP
- Architected Supabase backend (Auth, Postgres with RLS, Storage, Edge Functions) and clean REST APIs for training/analytics
- Subscriptions via RevenueCat and Apple In-App Purchases

### KLSLeadership Website (Freelance)

- Delivered a custom marketing site on Vercel; domain/DNS setup on Namecheap; email workflows via Resend
- Vite + TypeScript + Tailwind; fast, minimal, accessible UI
- SEO foundation: metadata, sitemaps, and structured data

### Roadwatch (UNLV Project)

- Shipped an MVP with Next.js + MongoDB; Dockerized the development environment
- Implemented map, reporting, and community features
- Collaborated across the team to deliver on a tight timeline
